EXPERIENCE

Symmons Industries, Inc.

Braintree, Massachusetts

Software Engineer

September 2025 – Present

- Serve as the technical owner of the Evolution mobile application, responsible for feature development, QA processes, release management, and production support across iOS and Android.
- Established and implemented mobile QA procedures, including regression testing workflows and release validation processes, improving consistency and reliability of production releases.
- Develop and deliver mobile features using React Native, TypeScript, and Expo, owning implementation from requirements through production deployment.
- Manage a weekly to biweekly mobile release cadence, including App Store and Google Play submissions, release documentation, and post-release monitoring.
- Design and develop Spring Boot backend services, controllers, DTOs and REST APIs powering the Evolution platform, enabling shared functionality across web and mobile applications.
- Designing and implementing a Salesforce integration with the Evolution platform, automating property and user creation and achieving contract visibility.

Tech Etch, Inc.

Plymouth, Massachusetts

Business Intelligence Developer

August 2022 – September 2025

- Developed an early job delivery Power BI report, through collaboration with stakeholders, contributing to a yearly \$4.0M increase in revenue.
- Created a SKU Health Power BI report that analyzes key metrics of every internal SKU, identifying over 150 SKUs for optimization to enhance company profitability.
- Built a responsive webpage consolidating deployed Power BI reports into a single hub, overcoming Microsoft's default portal limitations, streamlining report discovery and increasing stakeholder data accessibility.
- Automated a daily reporting task using Power BI, saving 31 hours annually in manual effort.
- Collaborated with various departments – from operations to the executive team – to understand reporting requirements and translate business needs into intuitive Power BI dashboards.

PROJECTS

Silver Home Health Services

Plymouth, Massachusetts

Team Lead

December 2025 – January 2026

- Built the complete online presence for Silver Home Health Services, a non-medical, private-pay home care business, including a responsive website with contact forms, service information, and client outreach features.
- Implemented secure contact workflows using Resend and Cloudflare Turnstile.
- Achieved a 96 Performance score and perfect 100s in Accessibility, Best Practices, and SEO on Google Search Console PageSpeed Insights audits, ensuring an optimal user experience across all devices.

Resume Builder

Plymouth, Massachusetts

Team Lead

January 2025 – March 2025

- Developed a full-stack AI-powered web application using Django and Supabase, parsing 2169 job postings into the database, enabling users to generate resumes or cover letters through Google's Gemini API.
- Utilized GitHub Actions, Docker, AWS ECR and EC2 to enable a CI/CD pipeline with minimal downtime and low latency
